ONE FREE CEU
FOR EACH TRAINING!**

Training #1 - Understanding Infant Adoption

This one-hour training explains the ins & outs of adoption to better understand how to present this option to women considering adoption for their child.

Training #2 - Safe Delivery

This one-hour training is specific to Safe Delivery cases ... also known as Safe Surrender or Safe Haven. This training is geared towards Emergency Service Providers (hospitals, fire departments, police departments, EMTs) and provides a detailed understanding of what is involved with facilitating a Safe Delivery case. It clarifies what constitutes a Safe Delivery case and includes step-by-step instructions.

If CPS is involved, this does not remove Safe Delivery as an option for women. Adoption Associates works together with CPS. This way, women still have the option to plan an adoption and avoid foster care. This provides more permanency/stability for the child as well as a better experience for the mother.
